Git test: edit run/preview save commit push open remote. Record the test commit and result.

sdfgsdfg

Instructor access and team Git readiness: what did you test? Solo: say solo.

team

1 Introduction scan notes, one useful idea and one question

Each video covers its own topic

video one covers: Game development mindset

video 2 covers: Folder structure

video 3 covers: documentation

video 4 covers: assets and the game itself

2 Developer mindset scan notes, one useful idea and one question

The good topics for a game development mindset

Adaptability

preservance

Collaboration

Customer Focus

3 Folders and project creation scan notes, one useful idea and one question

You want a folder and file for everything to keep it organized and make it easier for everyone to know what is what and what everything is for

4 Documentation scan notes, one useful idea and one question

the documentation is created to give people a preview of what they are downloading and a step by step guide how and where to download it at and how to install it correctly where it works

5 Introduction to Unity scan notes, one useful idea and one question

Unity comes with a bunch of preset templates and created assets that u can use to help u build your game u can also write it also will help u know what assets help u

6 Import a custom player scan notes, one useful idea and one question

Mixamo is the best place to find custom characters and custom animations for the charcter

Your interpretation: what can this pipeline contribute to a prior or new story?

this pipeline gives a basic understanding of the best features to create games

CS110 / INDEPENDENCE ROAD

Questions to resolve before committing to a team or mission

I dont have any

Whiteboard

U have to have a good mindset to be able to create games and with a good mindset and a basic understanding of everything then it helps u build things better
